

Comfort **DUETT**

The compact, multipurpose personal amplifier

The compact, multipurpose personal listener with superior sound quality!

The Comfort Duett is a small, easy-to-use and rechargeable assistive listening device with superior sound. It is stylish and ergonomic. The Comfort Duett amplifies speech, conversations and sounds from a variety of sources, such as TVs, radios and telephones.

The innovative base unit serves as an overnight charger as well as an interface to audio equipment like TVs and telephones.

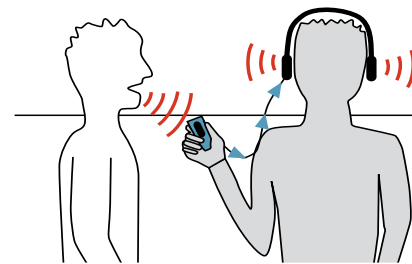

When using earphones the Comfort Duett is very discreet and resembles a stylish music player. With headphones the Duett can be used as a hearing aid alternative or, with its built-in T-coil and an induction neck loop, as a complement. All this makes the Comfort Duett the ideal communication tool for a majority of users.

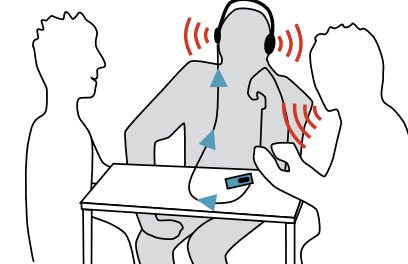

Solutions for everyday situations

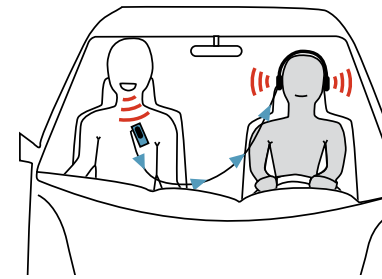

The Comfort Duett with headphones, charging in the base unit

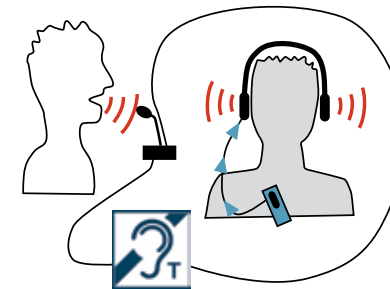

The Comfort Duett is a very adaptable communication tool and can be used as shown here.

Placing the Comfort Duett on the table improves conversations with several people, even in noisy surroundings.

The Comfort Duett is very lightweight and can be attached to clothing by its clip.

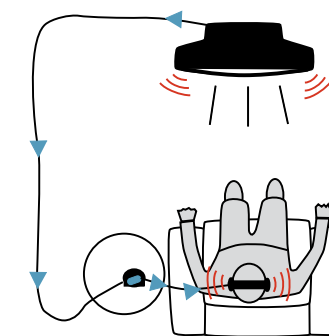

A built-in T-coil enables listening in induction loop systems.

ACCESSORIES

The telephone kit connects a fixed line telephone to the base unit. When the communicator is placed in the base it amplifies the telephone sound.

ACCESSORIES

The television kit connects the base unit to TV and stereo audio outputs via a 10-meter cable and delivers the sound via the base unit.

When the Comfort Duett is lifted from the base unit it immediately switches to communicator mode, picking up conversations.
